

U.S. Application Serial No. 09/314,819

### **REMARKS**

The present amendment is in response to the Official Action dated June 15, 2005, which largely cancels the claims for which rejections have been maintained and for which an alternative basis of patentability has not been established, as well as recasts the claims objected to by the examiner, but indicated to include patentable subject matter, so as to no longer be dependent upon a rejected base claim. As presently amended, claims 5-7, 9-12, 15-20, 24-26 and 32-37 are pending. The presently pending claims are believed to be in condition for allowance. Consequently the applicants would request that the Examiner reconsider the same. Allowance of the application is respectfully requested.

In the event, that there are any remaining unresolved issues precluding the issuance of the present application after consideration of the present response, before issuing a further rejection, the Examiner is respectfully requested to contact the applicants' agent at the below listed number to discuss the same.

Respectfully submitted,
